Sales Performance Analysis

An Excel project: formula analysis and insights

2,538	21	2014–2017	20
Order records	Data columns	Order period	States analysed

Project overview

This project summarises order-level sales data (Sheet1) into a state-level report (Sheet2) using Excel formulas.

It answers five questions for each state: how many orders, how much in sales, how it ranks, which segment leads, and whether profit is healthy.

2,538

Order rows in Sheet1

20

States in Sheet2

$438K

Sales across 20 states

$37.5K

Net profit across 20 states

Workbook structure

Sheet1

Raw data

2,538 rows, 21 columns: order, customer, segment, state, region, product, sales, quantity, discount, profit.

Sheet2

State summary

20 states with formulas in columns B to U and a totals row (row 22).

Output

Insights

Rank, segment mix, order recency, profit slab and red flags for low profit.

Whole-column ranges (Sheet1!I:I for State, P:P for Sales, S:S for Profit) let the formulas pick up new rows automatically.

Formula inventory

Column	Metric	Excel function
B	Region	VLOOKUP
C	Region : State label	CONCATENATE
D	Total orders	COUNTIF
E, P	Total sales	SUMIF
F	Rank by sales	RANK
G	Contribution %	Division with absolute row ($22)
H–J	Quantity by segment	SUMIFS
K	Leading segment	XLOOKUP + MAX
L–M	First and last order date	MINIFS, MAXIFS
N	Time since last order	DATEDIF + TODAY
O	Last order month	TEXT
Q	Average sale	AVERAGEIF
R, U	Total profit	SUMIF (U adds red formatting)
S	Profit after 18% tax	IF
T	Profit slab	IF + AND (nested)

Lookup, counting and ranking

VLOOKUP (B)

```
=vlookup(A2,Sheet1!I:J,2,FALSE)
```

Returns the region of each state.

Texas: Central

CONCATENATE (C)

```
=CONCATENATE(B2,":",A2)
```

Joins region and state into a label.

Texas: Central:Texas

COUNTIF (D)

```
=COUNTIF(Sheet1!I:I,A2)
```

Counts matching rows. See review.

Texas: 232

SUMIF (E)

```
=SUMIF(Sheet1!I:I,A2,Sheet1!P:P
)
```

Adds sales for the state.

Texas: 32,876

RANK (F)

```
=RANK(E2,E$2:E$21,0)
```

Ranks states by sales, high to low.

Texas: 3

Contribution (G)

```
=E2/E$22
```

State sales as a share of the total.

Texas: 7.50%

Segments and dates

SUMIFS (H–J)

```
=sumifs(Sheet1!Q:Q,Sheet1!I:I,A2,Sheet1!G:G,$H$1)
```

Quantity by state and segment.

Texas: 259 / 406 / 160

XLOOKUP (K)

```
=XLOOKUP(MAX(H2:J2),H2:J2,$H$1:$J$1)
```

Names the segment with most units.

Texas: Consumer

MINIFS (L)

```
=minifs(Sheet1!C:C,Sheet1!I:I,A2)
```

Earliest order date for the state.

Texas: 03-Jan-2014

MAXIFS (M)

```
=maxifs(Sheet1!C:C,Sheet1!I:I,A2)
```

Latest order date for the state.

Texas: 26-Dec-2017

DATEDIF (N)

```
=datedif(M2,today(),"Y")&" Years "&…
```

Time since last order. Updates daily.

Output: Y Years M Months D Days

TEXT (O)

```
=text(M2,"MMM - YY")
```

Formats last order month.

Texas: Dec - 17

Profit and classification

AVERAGEIF (Q)

```
=AVERAGEIF(Sheet1!I:I,A2,Sheet1!P:P)
```

Average sale value per state.

Texas: 141.71

SUMIF (R)

```
=SUMIF(Sheet1!I:I,A2,Sheet1!S:S)
```

Total profit for the state.

Texas: -3,323.43

IF (S)

```
=if(R2>0,R2*(1-18%),"no tax")
```

Applies 18% tax to positive profit.

Texas: no tax

IF + AND (T)

```
=IF(R2<10000,"<10K",IF(AND(R2>=10000,R2<=20000),…))
```

Assigns a profit slab.

Texas: <10K

Conditional format (U)

```
Cell value < 10000, red fill
```

Flags low or negative profit.

18 of 20 states flagged

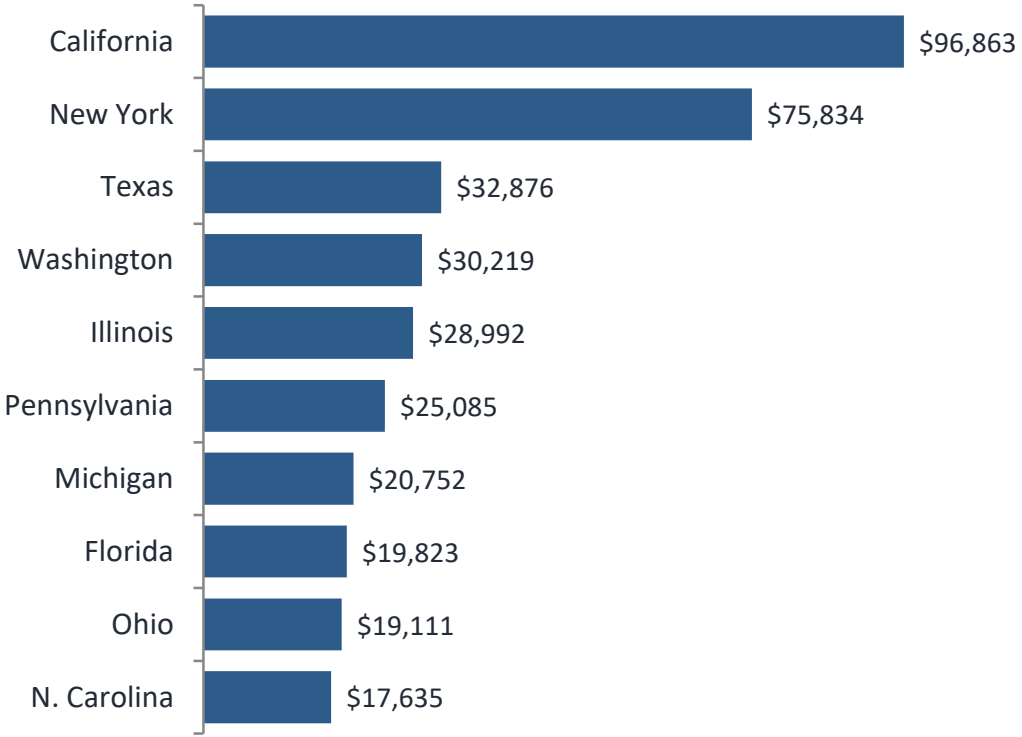

SUM (row 22)

```
=SUM(D2:D21)
```

Totals row for key columns.

E22: 438,097

Sales by state

22.1%

California share of sales

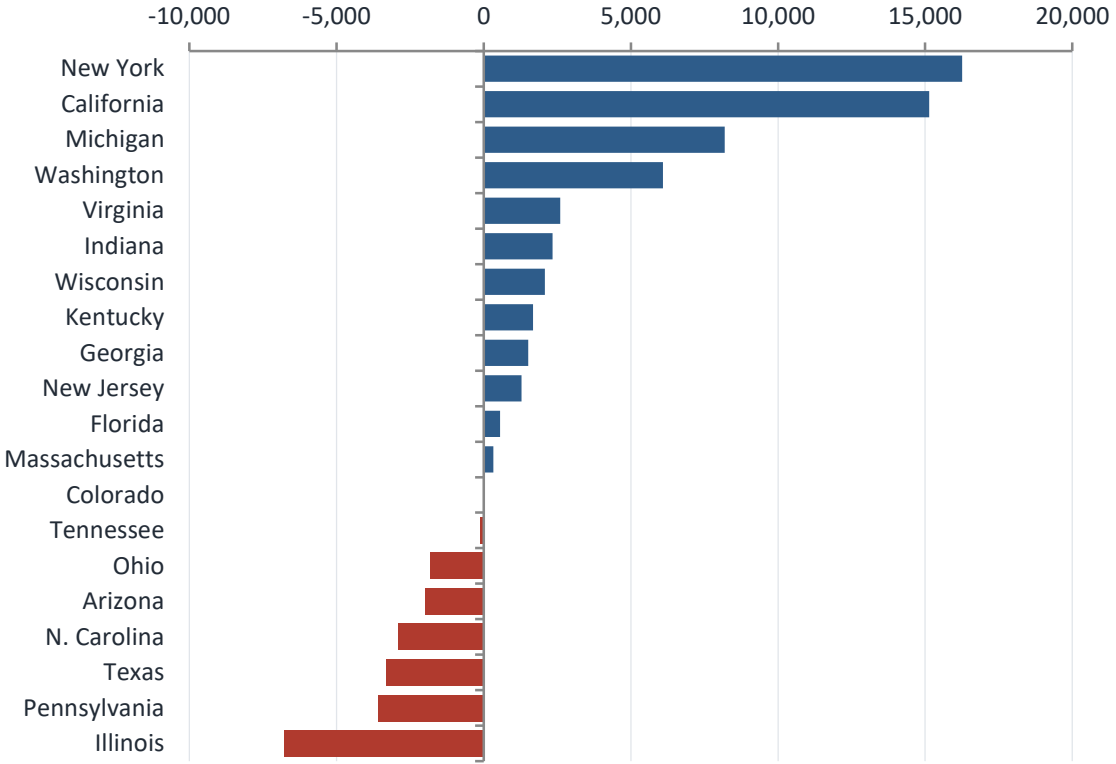

39.4%

California + New York

Consumer

Leads 19 of 20 states

Profit by state

2 of 20

States above $10K profit

8 of 20

States with negative profit

-$6.8K

Illinois: largest loss

Key findings

46.9%

Top states by sales

California 22.11%, New York 17.31%, Texas 7.50% of total sales.

52%

Consumer segment

Consumer is 1,317 of 2,538 orders and leads in every top state.

18 of 20

Profit concerns

States sit below 10K profit. Texas, Illinois and Pennsylvania are negative.
